

**TACTICS** (Training Assessment of Clinicians in Teams in Intensive Care through Simulation) is the only national simulation assessment program for paediatric critical care subspecialty trainees in Canada and proud to be part of Critical Care Canada Forum's pre-conference series of events.

This annual simulation assessment day brings together expert education faculty and inter-professional specialists from across Canada to develop, facilitate and promote innovative simulation and assessment approaches for residents and fellows in paediatric critical care training programs and delivers focused training for respiratory therapists and critical care nurse team members. We have experienced outstanding benefit from previous events with enhancing collaboration and sharing ideas across our specialty.

*This activity is an Accredited Simulation Activity (Section 3) as defined by the Maintenance of Certification Program of The Royal College of Physicians & Surgeons of Canada, and approved by the SickKids Simulation Program on 10/09/19 and expires 09/2022. Remember to visit MAINPORT to record your learning and outcomes. You may claim a maximum of 8.5 hours (credits are automatically calculated).*

**Overall Objectives:**

- provide a **positive, safe learning experience** for all members of the health care team
- advance the way we use simulation for training and assessment
- connect with our Canadian Paediatric Critical Care Medicine community

Participants will rotate between 8 simulated scenarios, each developed by expert faculty from across Canada and with individual learning objectives. Beyond the assessment and learning outcomes from this event, we aim to promote new innovative ideas across critical care medicine.
